# REPORT

OF THE

## SUPERINTENDING SCHOOL COMMITTEE.

---

The Superintending School Committee of Hopkinton, N. H., respectfully present this, their Annual Report, of the condition of Schools the current year, ending March 9, 1869, as required by the General Statutes of New Hampshire.

The Committee have attended to their duties as prescribed by law; have visited all the sessions of schools, at least twice, and sometimes more. They have given needed counsel to teachers, to aid them the better to discharge their responsible duties. The children and youth have been encouraged to study, to improve their time, to form habits of industry, to love virtue, to practice that discipline in the developing process of education, and to progress in treasuring up that amount of knowledge which they will need to become useful and valuable citizens.

Our schools have been favored, mostly, with experienced and well qualified teachers. Good success has generally attended their labors. Portions of them excelled; and truly magnified their office. The deportment of teachers, with few exceptions, has been urbane and uniform. *Abruptness* in a teacher is a great fault, and should be avoided. A polished taste and cultivated manners give ease of access, inspire confidence, and establish influence over mind, permanent and enduring.

The School Committee of last year recommended a change in geographies, and then gave a reason for such a change.

NOTE. "*Guyot's Geographies*. Your committee have recommended and introduced the 'Elementary' and 'Intermediate' grades of this excellent series for use in our schools. The result of one term's use has fully justified their introduction. An unusual interest has been awakened on the part of scholars, and teachers are nearly unanimous in their praise.

"Their benefits have not been fully realized as yet, and though a great impulse has been given to this branch of study, we shall look for better and better work, from both teacher and pupils, for years to come, as they become imbued with the spirit, and familiar with the methods of the unrivalled author and teacher. It speaks unmistakably for the merits of the book, that a larger number of copies by two-fifths have been taken and used, than were before used of all kinds."

C. W. B.

*Town's Progressive Readers, Revised and Enlarged.*

This excellent series of books is the only one now used in our schools. All the *old* editions of books have been exchanged for new ones by the enterprising and liberal publisher, book for book, where the books had not been much injured by use. A small boot, in a few instances, was required between worn and defaced books, and new ones. New pieces of better adaptation to the inflections of the voice, and of more thrilling and inspiring sentiments, had been interspersed through the revised and enlarged series, so that there was great inconvenience in using the old and new editions in the same class, occasioning a loss of time of both teacher and pupil in selecting lessons common to both editions. In some of the books, twenty pages of choice selections have been added, thus rendering these superior reading books admirably adapted to the wants of common schools. The town has received a great benefit from this arrangement. The committee do not regard this as the change of a text-book. The same book is still recommended.

*What Books must be used in Schools by Law.*

By Section 13, Chapter LXXXI, General Statutes of New Hampshire, "The parents, masters or guardians of the scholars attending schools, shall supply such scholars with the books required to be used in schools."

*List of Text Books*

Legally recommended, and the only ones authorized to be used in the District Schools in Hopkinton, N. H.

*Reading*—Town's Series, revised and enlarged.

*Speller and Definer*—Town's.

*Arithmetic*—Greenleaf's Series, and Greenleaf's Algebra.

*Geographies*—Guyot's Series.

*Penmanship*—Payson, Dunton and Scribner.

*English Grammar*—Brown's Series.

*U. S. History*—Quackenbos' and Child's United States.

*Physiology*—Jarvis's.

*Book-Keeping*—Mayhew's—recommended two years since.

By advice of the State Superintendent, the School Register will be lodged with the Clerks of the several school districts.

The readers of this report are referred to the several topics of last year's School Report for definite, useful suggestions.

To learn the condition of district schools, read the individual report of each. Carefully peruse the statistical table on the last page of this report.

DISTRICT No. 1.

*Summer Term*—Miss Priscilla A. Kimball taught this school during the Summer term, and labored untiringly for the inter-

ests of her pupils. A portion of the school appreciated her efforts, and made commendable progress. But this district is confessedly one of the most discouraging for a good teacher. Public sentiment should make tardiness and idleness disgraceful. Let these vices be viewed with the reprobation they deserve by the parents and friends, and they will be eradicated and an interest in study awakened.

B.

*Winter School*—George W. Currier, Esq., teacher. Mr. Currier entered his school with earnestness and energy, always at his post. His instruction was thorough, and the progress of his school was great, greater than on any former occasion under my observation. His scholars in Guyot's Geography, passed a very satisfactory examination on two maps normally delineated on the black-board. The class in book-keeping went through the book. 269 times tardy; by no means creditable to the district.

S.

#### DISTRICT No. 2.

*Summer School*—Miss Mary E. Rowell, teacher. Miss Rowell taught here for the first time. She appeared zealously engaged, exerting herself for the best interest of her school. From what we saw of the school, we should judge that good progress was made.

G.

*Winter School*—Mr. E. Harvey Edmunds taught the Winter term of this school. His energy and devotion to the work in hand sensibly affected those under his care, and they made as great improvement as could be reasonably expected during a term so short. This school has been regarded in some respects as difficult to control; we hope that all who hereafter attend, will remember that the school-room is a place for study and implicit obedience.

B.

#### DISTRICT No. 3.

*Summer School*—Miss Julia R. Clough, of Webster, commenced the Summer term of this school with a degree of interest which promised well for success. But this promise was not entirely fulfilled. The teacher, however, should be absolved from all blame. A more experienced teacher might have been discouraged under the circumstances. If the enforcement of necessary discipline must kindle the passions of parents or guardians into a blaze, and if they must consult their passions rather than the good of the scholar, or the interest of the school, then let them say good-bye to successful schools, and have done with them at once.

*Winter School*—The services of E. Harvey Edmunds were secured for a portion of the Winter term. It is needless to say that those who attended the school were orderly, and applied themselves to their studies. Mr. Edmunds is a faithful and

competent teacher, and it is no reflection upon him that some of the pupils were taken out of school. He was under a previous engagement and could not remain through the term. Miss Clara A. Flanders was engaged to complete it. She labored well, and commendable improvement was manifest; and we wish that we could say that she had the sympathy and co-operation she deserved. Unfortunately, she had to contend against the same adverse influences as her predecessors. B.

#### DISTRICT No. 4.

*Summer School*—Miss Josie Page, of Sutton, N. H., teacher, during the Summer term, gained the respect and confidence of both scholars and parents, proved herself every way worthy of regard. Excellent order characterized the school. At the teacher's request, whispering was entirely banished from the the school-room. There was an earnest desire to improve, and the advancement was eminently satisfactory. B.

*Winter School*—The Winter term was taught by Miss Eva F. Burnham. Under this experienced and efficient teacher, this school continued to maintain its well earned reputation for order and love of study. It is one of our most advanced schools, having a much wider range of studies than the usual limits of a district school. The least that parents can do to reward their children is to give them a decent school house. B.

#### DISTRICT No. 5.

*Summer and Winter Schools*—Miss Cordelia M. Withee, of Sutton, N. H., teacher. At our second visit, the order was good, and the progress satisfactory. Elementary instruction received attention. The improvement in the Winter school was fair. The rules for reading did not receive attention. Self-reliance should be the motto of older scholars; they should study their text-books, and digest their lessons, not relying on their teacher to solve *all* their problems, like placing food in the mouth of a bird without any effort of its own. The new school house erected will not be occupied until next year. S.

#### DISTRICT No. 6.

The *Summer* and *Winter* terms were both taught by Miss Ellen H. Sargent. Her aim has been to awaken an interest in study. Her incessant efforts for this end have been rewarded by a perceptible improvement, a result which reflects no light praise upon her perseverance and skill. This school is easily governed, but has been known as dull. It has a more hopeful future. B.

#### DISTRICT No. 7.

This school was taught during the *Summer* and *Winter* terms by Miss Ruth A. Livingston, of North Troy, Vt., an experienced

teacher. This is an interesting school. The scholars love their books, and are obedient. The results of the Summer term were highly gratifying. The Winter term was much broken towards its close from illness and other causes, and many of the most advanced pupils were not present at the examination. We can speak, without reservation, in praise of teacher and scholars. Something should be done to provide a suitable building for a school house. B.

#### DISTRICT No. 8.

The *Summer Term* of this school was taught by Miss Anna R. Clifford, an ambitious and enthusiastic teacher. She writes that her "pupils were obedient, and from higher motives than hope of reward or fear of punishment." She won universal love and esteem. The school is one of our best. In Miss Clifford's untimely death, we suffer a great public loss. B.

Miss Priscilla A. Kimball, taught the *Winter Term*. There were several more scholars than in the Summer. The school was orderly and studious, and we may remark, by the way, that in such schools, there are always advanced classes. Miss Kimball has added to her reputation as a good teacher by teaching in her own district to the entire satisfaction of all. B.

#### DISTRICT No. 9.

*Winter School*—Mrs. Helen M. Eastman, teacher. This was a quiet and pleasant school. The progress was good. The efforts of the teacher were successful; only one term. S.

#### DISTRICT No. 10.

*Summer School*—Miss Susan C. Eastman, of Henniker, teacher. Miss Eastman is a teacher of large experience, with a manner of teaching peculiar to herself; a hard and earnest worker, making everything connected with the school as practical as possible. We would, however, suggest that too much time should not be spent for the last day. C.

*Winter Term*—This district obtained the services of Mr. Edward A. Merrill, a Dartmouth student. Mr. Merrill labored earnestly to make the term profitable to all. Those who were willing to improve the opportunity, made good progress. The classes in reading evinced unusually good drill. Where so much was excellent, we are sorry to find any fault, but feel constrained to say that there was a partial failure in the government of the school. We believe that good order is as essentially required in the school-room as in reading or spelling; and if moral suasion fails, some remedy must be applied which will secure it. B.

#### DISTRICT No. 11.

*Summer School*—Miss Mary E. Brown, teacher. This is one of the smartest schools in town. At our first visit, we antici-

pated a profitable term. The teacher was untiring in her efforts, and she was nobly seconded by her pupils; great praise is due them for their good deportment. At our second visit, our anticipations were fully realized, showing conclusively that an able, hard-working teacher, with smart scholars, necessarily makes a smart school. c.

*Winter School*—Miss Mary E. Brown, taught two weeks, and then left in consequence of ill health

*Winter School*—Mrs. Thomas B. Richardson, teacher. This lady taught through the term. The order at the close of the school was good. The spirit of kindness ruled and predominated. The instruction was practical and thorough in all the branches, and the progress very satisfactory. The class in Guyot's Geography excelled. The efforts at primary map-drawing were highly creditable. Whispering was in a measure suppressed. The ten following scholars did not whisper through the term except by permission, namely, Silvie E. Clough, Mary E. Clough, Flora E. Clough, Georgie A. Kezer, Sarah A. Dunbar, Ida J. Hardy, Frank P. Annis, Charles C. Annis, Joseph S. Clough, and True W. Rand. s.

#### DISTRICT No. 12.

*Summer School*—Miss Mary P. Sargent, teacher. This was an orderly, quiet and well managed school. Elementary general instruction, received a proper share of attention, such as the rules for reading, sentential pauses, classification, &c. Commendable progress was made in all the studies. s.

*Winter School*—Miss Joanna Richardson, teacher. The scholars were interested in their studies, and made good progress in the several branches pursued, direct, general, and elementary. Miss Richardson ranks among our best teachers. s.

#### DISTRICT No. 13.

*Summer School*—Miss Joanna Richardson, teacher. The teacher was earnest, faithful and devoted to her vocation. Good improvement was the result. s.

*Winter School*—Miss Susan C. Eastman, of Henniker, teacher. Great harmony prevailed in this school among teacher, pupils, and parents. The teacher worked hard, and infused her own enthusiasm into the minds of her scholars. This school is No. 1, and the most advanced in town. Great progress was made in all the studies; much general instruction was given. Several well executed maps were delineated on the black-board by older scholars, as taught by Guyot's Geography, and intelligently explained. They classified well, and gave the meaning of many geographical proper names. Miss Eastman says, "six scholars went through the National Arithmetic and reviewed. A majority of the class not only *did do* every exam-

ple, but *could* do every one when the term closed. The classes in Algebra and Book-keeping, went through the book; in Geometry, to the fourth proposition." I visited the school a few days before its final close. Two lovely young children then present soon sickened and died. An adult young lady full of life and hope, since the close of last winter's school, has deceased. These sudden deaths cast a gloom over the school. God bless the afflicted and sanctify these providences for their spiritual good. The teacher alludes specifically to the labors of the committee. For these, she has his thanks. The scholars in District No. 13, made me a valuable present, strongly represented, at the residence of kind neighbors. This memorial of their respect will stand among my endearments of life, and will never be forgotten. Sickness and death caused the school to close prematurely, two weeks before the allotted time. s.

#### DISTRICT No. 14.

*Summer and Winter Schools*—Miss H. Matilda Palmer, teacher. Good proficiency was made in the several studies pursued in this small school. Elementary and general questions were promptly answered. The teacher labored faithfully and successfully for the best good of her pupils. s.

#### DISTRICT No. 16.

*Summer School*—Miss Abbie E. Wood, of Henniker, teacher. This was Miss Wood's first school. At our visits, the school appeared quiet and orderly. Good progress was made. c.

*Winter School*—Mr. Thomas B. Richardson, teacher. This is emphatically a No. 1 school. The teacher not only sustained his high reputation of former years, but surpassed himself. Study and experience have augmented his ability to give improved instruction. New formulas shortening the process of solving problems in Arithmetic were illustrated from the black-board. The proficiency of this school in all the studies was excellent. The spring term of Contoocook Academy, under Mr. Richardson, commenced February 24, 1869. s.

#### DISTRICT No. 17.

*Summer and Winter Schools*—Miss Sarah U. Kimball, teacher. At our last visit, the order was good. The example of the older scholars contributed to this result. Miss Kimball is mild, faithful and industrious, and teaches well. The progress in study was excellent, and her services were acceptable to the district. s.

#### DISTRICT No. 18.

*Summer School*—Miss Jennie B. Abbott, of Concord, teacher. This was Miss Abbott's first attempt at teaching, and it proved

very successful. The school is small, but wide awake ; at the close, it showed a very decided improvement. c.

*Winter School*—Henry C. Brown, teacher. This is a happy, pleasant, and well disposed school. The teacher was at home in the school-room. His image was reflected by his pupils. This school passed a good examination in their studies ; excelled in the new system of Geography and classification, and were prompt in answering elementary and general questions. s.

#### DISTRICT No. 19.

*Summer School*—Mrs. Nellie M. Staniels, of East Concord, teacher. Mrs. Staniels is an experienced teacher, and the district was fortunate in securing her services. Everything connected with the management of the school was in perfect order. Under such circumstances, the improvement was necessarily good. c.

*Winter School*—The Winter term, in this district, has been a pleasant and profitable one to all well-disposed scholars—Mrs. Nellie M. Staniels labored with her usual efficiency in this school. The progress of her pupils constitutes the highest praise of her qualifications as a teacher. Tardiness is a great evil in this school. The number of marks equals that of District No. 1. B.

#### DISTRICT No. 20.

*Summer School*—Mrs. Helen M. Eastman, teacher. She labored for the best interest of her pupils, and a corresponding degree of improvement was made. c.

*Winter School*—The winter term of this school was taught by the well-known and approved teacher, Mr. Charles Gould, Esq. Most of the scholars are backward in their studies, but made commendable progress. This school, like some others in this part of the town, was more or less interrupted by sickness. The term closed unexpectedly, and the examination occurred without review ; but it was evident that the studies had been well understood and learned in the first instance. B.

#### DISTRICT No. 21.

*Winter School*—only one term—Mr. Charles E. French, teacher. There were only two scholars in attendance here till the last week or two of the school. The teacher did all that could be done under such circumstances, and in our judgment would do well in any common school. We understand that this district intends to apply to the proper authorities to be set off with the adjoining district in Webster. We hope proper means may be taken to prevent this. The proper thing to be done, is to consolidate all the districts embraced within a circle, passing round the village a mile and a half distant, and to insti-

tute a graded school. We have heard but one objection to this,—the expense. Let some careful business man estimate the comparative expense of each system for a period of years, say five or ten, and we are sure that the change would be found the most economical course.

B.

## DISTRICT No. 24.

*Summer School*—1st Session—Miss Eva F. Burnham was employed to teach the Summer term of this school. Her course was entirely satisfactory to the committee. Among the excellences developed under her instruction, we note the cheerful and ready obedience, the studious habits, and the promptness in recitation, which particularly distinguishes the pupils in this district. One fault, tardiness, demands correction.

*Fall School*—2d Session—The Fall term was taught by Miss Susie B. Smart, of Sanbornton. She spared no labor to promote the best interests of the school. Her success must be measured by the perfect understanding which her scholars had of the subjects to which they had attended. The discipline was satisfactory. This district has been very fortunate in a succession of superior teachers.

B.

*Winter School*—3d Session—Miss Susie B. Smart, of Sanbornton, teacher. Miss Smart is a thorough and efficient teacher. Her manner of conducting recitations was systematic. Her method of teaching was of a high order, and admirably adapted to the purposes of instruction. Map-drawing, in the use of Guyot's Geography, was scientific. The utility of object teaching was visible. Topical and descriptive recitations of young scholars exceeded any that have come under my observation. The progress in all studies was excellent.
